EZ-PATH FIRESTOP DEVICE SAFETY DATA SHEET

ACCEPTABILITY:

All firestop equipment including devices and related accessories must meet strict standards.

« CE » marking:

There are no CE certificates for firestopping devices. EZ-Path products have been tested in some countries in Europe according to that country's standards: (EN 1366-3 in France, DIN 4102-9 in Germany, BS 472-20 in UK)

SAFETY:

Potential Health Effects:

- Eyes: Physical contact may cause some irritation. (If this happens, wash the eyes with running water for at least 15 minutes. Seek medical attention if irritation continues)
- Skin: Contact should not cause any irritation.
- Ingestion: Highly unlikely, however if ingested seek medical attention.
- Inhalation: No hazard
- Non carcinogenic product.
- Long term toxic effects: None known

Personal protection:

- Eye protection requirements: Safety glasses/goggles
- Skin protection requirements: None
- Respiratory requirements: None
- Ventilation requirements: If needed, ventilate to keep airborne concentrations below the TLV

Stability and reactivity:

- Stability: This is a stable material.

All tests and certificates were carried out by independent and accredited laboratories.

- Conditions to avoid: None in particular
- Hazardous polymerisation: Not applicable
- Incompatibilities: Not applicable.

Toxicological information:

Contains no carcinogens as specified by IARC (International Agency for Research on Cancer), ACGIH (American Conference of Governmental Industrial Hygienists), and OSHA (Occupational Safety and Health Administration).

Ecological information:

No information available but not expected to be environmentally dangerous.
